

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A repetitive controller having the form of a memory loop fed with a periodic signal of period NT and in which the memory size includes of  $N/2$  memory elements, the feedback connection is negative and a factor of  $-1/N$  is provided at the output of the memory loop, wherein N is an integer and T is period of time.

2. (Currently Amended) In a recording and reproducing apparatus including a head for recording data on a recording medium or reproducing the recorded data from said recording medium, a drive servo system for said recording medium, said system comprising a disturbance compensation module for compensating for the eccentricity of the recording medium, said module using
